

## Graham Spray Equipment Launches LawnScaper, New All-in-One Rig for Lawn Care—Landscaping Businesses

DOUGLASVILLE, GA, April 26, 2018

Graham Spray Equipment is pleased to announce the latest addition to its lineup of high-quality spray equipment and rigs: the GSE LawnScaper. Designed to meet the needs of the growing number of companies that provide both landscaping and lawn care services, the LawnScaper accommodates a 300-gallon or 400-gallon Graham spray unit, a ride-on mower or spreader sprayer, and other landscape and spray equipment right on the bed of an Isuzu NPR-HD truck. Because the ride-on equipment sits on the truck bed, users of the LawnScaper avoid the hassles and hazards of towing a trailer.

Along with enhanced safety, the LawnScaper provides versatility and efficiency in several ways. The skid-mounted spray unit can be removed whenever it makes sense to use the rig for landscaping only. A forkable heavy-duty steel frame for the hose and reel setup gives field techs total flexibility in using the hose or a spreader sprayer to apply liquid products. The fiberglass tank can be compartmented according to customer specification. For example, a 300-gallon tank can be split into a 190-gallon compartment for lawn applications and a 110-gallon compartment for tree and shrub applications. Fold-down bed rails and a split gate with gate assist make it easy to load and offload equipment.

The Isuzu truck used for the LawnScaper features a 14-foot heavy duty landscape bed with an additional 4-foot dovetail, a removable block fence to protect the spray unit, and an underbody tool box. The NPR-HD truck has 152-inch wheelbase and GVWR of 14,500 pounds.

*“More and more of our customers are landscapers who want to add lawn, tree, and shrub care so they can be a full-service business. With the LawnScaper we can give them a rig that’s safe and meets all their needs.”*

– **Dave Arnett**, *Graham Sales Manager*

The standard Graham spray unit features a 300-gallon fiberglass tank with jet agitation, a 5.5-hp Honda engine with electric start, an AR-30 diaphragm pump, and a Hannay reel with power rewind, among other proven components. Several options are available, including a 400-gallon tank (maximum) and dual-pumping systems.

Like all Graham spray rigs, the LawnScaper comes with lifetime phone support and, with proper maintenance, can deliver reliable service for 30 years or longer.
