Press Release

Introducing the Maverick: The Bigger, Better, Affordable Spray Rig from Graham Spray Equipment

DOUGLASSVILLE, GA, April 23, 2019

The pickup truck equipped with a spray unit has long been the more affordable option for lawn care professionals compared with a fully equipped, dedicated spray rig. The newly launched Maverick spray rig from Graham Spray Equipment changes that. The Maverick costs less than the combination of a high-quality pickup and spray unit.

The new Graham spray rig offers additional advantages. Its turning radius is much tighter than a pickup's, providing superior maneuverability on the road. Its spacious aluminum flatbed, measuring 10 feet by 8 feet, provides ample storage and cargo capacity. The open layout makes it easier and more efficient to work with spray equipment when doing applications.

"The Maverick is a great alternative for guys who are still growing their lawn care businesses and for larger, more established companies that want to expand their fleets but don't need the largest rigs available."

– Dave Arnett, Graham Sales Manager

Graham also offers mechanical agitation, piston pumps, and a carrier for a 36-inch ride-on spreader as options. Like all Graham spray rigs, the Maverick comes with lifetime phone support and, when properly maintained, can deliver reliable service for 30 years.
